

DESTONER SPECIFICATION

Capacity: **180kg roasted coffee**
Efficiency: **60kg/5min (adjustable)**

The ability to control the destoner (as a separate / independent device)

Destoner parameters:

- control integrated directly from the SR60 roaster
- electric power supply 380V 50/60Hz (from roaster)
- adjustable thrust by inverter
- made of steel S235
- built-in neodymium magnet for capturing metal parts (from roasted coffee)

The accuracy depends on the set capacity (set thrust)

Warranty: 1 year.
